SPECIALISTS

Welcome to the
Howard F Hudson
Retail Catalogue

Howard F Hudson (HFH) is an Australian owned hardware distributor that has been operating since 1901.

We are dedicated to servicing the retail hardware industry by supplying a range of specialist brands, most of which are exclusive to HFH.

Our brands include:

- › **HFH** Spring Hinges
- › **Ritefit** Door Hardware
- › **Carbine** Locking Products
- › **Lenlok** Locks, Garage Door Hardware & Disabled Care Hardware
- › **Lencare** Grab Rails, Hand Showers
- › **Keyline** Keys, Key Accessories & Key Machines
- › **Ryobi** Door Closers

Our comprehensive range of products are continually being assessed and improved in order to stay ahead in an ever progressing hardware market. Through ongoing market research, we will continue to introduce new and innovative products into the marketplace.

We would like to take this opportunity to thank you for your ongoing support and hope you find the contents of this catalogue both informative and useful.

*The Team at
Howard F Hudson*

What We Offer

▷ Efficient Customer Service - Our customer service team is available on 1300 724 422 for placement of orders as well as friendly advice.

▷ National Distribution Network - Ritefit products are distributed across Australia through distribution centres located in Sydney, Melbourne, Brisbane, Adelaide and Perth.

▷ Free Shipping - We offer free shipping for all orders over $120.

▷ Online Ordering and Account System - The Daveweb online ordering system allows customers to access a range of services and information 24 hours a day including:
  › Placing orders online
  › Checking the status of delivery for a placed order
  › Checking stock availability
  › Checking the status of an account
  › Making a payment online
  › Browsing through a product range
  › Reading detailed product information
  › Printing product brochures for end-users

Ordering

Online Ordering DaveWeb

1 Log into daveweb.com.au using your customer login and you will see the HOME page.

This is where you can place orders online. You can also find information about your account status, yearly spend - current for the last 2 years and a quick view of your most recent orders.

2 Go to the place order screen for ordering or finding stock status and your pricing.

Once you locate the product code, either in this catalogue or online via Daveweb, you can obtain current product prices and availability.

So give the Daveweb ordering function a go. If you need our assistance, give our customer service team a call, they're able to get you up and running on Daveweb.

Of course you can still order by phone if you prefer. The above is also the screen the customer service personnel will use when you're on the phone placing an order. If you open Daveweb while ordering over the phone, go to this screen and periodically hit the F5 key. This will refresh your screen and will allow you to see what is being placed on your order.

RITEFIT LOCKSET SPARES

As a supplier of lock furniture, Ritefit also provide back up to their range with a selection of lock spare parts. The most interesting aspect of this is that the Ritefit spare parts are sold in display hang packs, offering a solution to greasy, dust covered areas of many retail and building supply outlets.

Ritefit Tiebolt Latch

Here is a selection of spare backsets for the Ritefit EDT and ER series of locksets as well as the 808 and 909 lever sets. Features include:

• Suits all the Ritefit tiebolt mechanism lock or lever sets
• Tiebolt mechanism for both deadlatching and plain latch backset
• Deadlatching backset will suit entrance sets (EDTE, ERE, 808ET, 909ET)
• Plain backset will suit privacy (EDTB, ERB, 808BK, 909BK) and passage (EDTP, ERP, 808PS, 909PS) sets
• 60-70mm adjustable
• Standard or 45 degree movement
• Available in display packaging

SCREEN DOOR LOCKS

RiteFit Screen Door Shield

As a supplier of lock furniture, Ritefit also provide back up to their range with a selection of lock spare parts. The most interesting aspect of this is that the Ritefit spare parts are sold in display packs, offering a solution to greasy, dust covered areas of many retail and building supply outlets. Features include:

• Made to fit behind a security screen door
• Its purpose is to stop intruders from cutting the screen wire and gain access to keys either left in the cylinder or gain access to an interior turn snib on the lock
• Easy to install
• Two models to choose from:
• Model (SDS-1) has a cut out in the shield where the screw hole and spindle of the furniture handles nestles into. It is secured to the door by then tightening up the handle screws, thus meaning no screw hole drilling into the door. Measures 230mm (H) x 120mm (W) x 2.5mm (T). Cut out measures 140mm x 19mm.
• Model (SDS-2) is secured to the door by 4 fixing points. Ideally this is positioned next to the door handle and screwed into the door. Measures 240mm (H) x 105mm (W) x 2.5mm (T)

Ritefit Padlock 50mm

The Ritefit range of padlocks are a quality range of keyed to differ and keyed alike padlocks. A feature of this range is that the padlocks can be re-ordered in the same keyed alike suite again and again. They can be purchased in a keyed to differ form in display pack, keyed to differ in a boxed pack and keyed alike in a box pack. Features include:
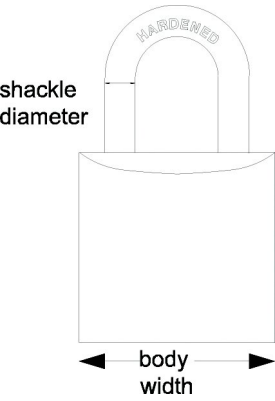

• 50mm body width and 7.92mm shackle diameter
• Long shackle version 50mm body width and 7.92mm shackle diameter with extended clearance of 80mm
• Horizontal clearance of 27mm between the insides of the shackle
• The key code is easily identified by a number stamped on the head of the key, for example 501. This signifies that you have a 50mm body padlock (50) keyed alike on group number one (1) = 501.
• The numbering system follows through the padlock range eg 403 (40mm body padlock on group number 3), 507 (50mm body padlock on group number 7) etc
• Padlocks such as described above can be reordered on the same key number again and again
• Padlock is a brass body with a hardened steel shackle
• Key blanks are available, use CS50KB

RITEFIT TOILET HARDWARE

RiteFit is quality Toilet Partition & bathroom hardware tailored to the builder and home improvement market. It covers a full range of toilet hardware to suit all common situations. RiteFit is quality at the right price. Developed and refined over several years, our specialisation in the door furniture and locking market assures you that RiteFit is the right choice. The Ritefit toilet hardware range includes spring and gravity hinges, indicators, hat and coat hooks, toilet roll holders, bumpers and staples and adjustable legs for partitions.

PARTITION TOILET HINGE

Ritefit Gravity Hinges

The Ritefit selection of toilet partition hinges offer the most suitable hinge to fit nearly all toilet hinge installations. The manufacturers of this product understand that many of the hinges sold today will be required to replace hinges of some decades ago. The Ritefit range covers most of those installation options, adding further weight to the range supplied.

Please note that in some circumstances you will be required to offer handing of the door in order to get the correct hinge. Handing is done this way: Position yourself on the inside of the door looking out, determine what side the hinges are on. If they are on the left side of the cubicle, they are deemed as a left hand hinge. If they are on the right hand side of the cubicle, they are deemed as a right hand hinge. Features include:

• Especially designed to enable the cubicle door to lift off if the need arises to gain emergency access
• Meets government regulations relating to emergency access
• Two models to choose from:
• 106/106B which are made from diecast zinc with a stainless steel shaft
• 206/206B which are made from stainless steel
• Concealed fixing options available on request
• Has nylon inserts for ease of operation
• Handed either left or right hand. Handing will be required at the point of ordering
• Can be ordered in the functions of hold open (HO) or hold closed (HC)
• Fixing options of less screws/no fixings (NF), screw fixed (SF) or bolt through (BT)
• Sold per pair
• Screws or bolts supplied within the package, except for less screw package option.

• A way to increase sales through customer usage of the product
• The display is made of MDF board with a royal blue finish
• It is supplied less the locks. If required we can add your choice of Ritefit locks to the stand, whether you want round, tulip or lever design
• A Ritefit sticker is included in the package and simply transfers on to the block unit
• It is recommended that you pre drill the screw holes when fixing the latch to avoid the possibility of splitting the timber.

CARBINE LOCKSETS

C arbine is a high-end brand of locking and hardware that is chosen by locksmiths and installers. Carbine pushes the boundaries and looks to solve the problems that have dogged the industry for years by featuring products with innovative design and modular functionality. The Carbine Lockset range features commercial and residential series that are rekeyable to suit most commercial and restricted keys. Knobs, Levers or combination sets suiting most functions including entrance, vestibule, patio, glass, classroom, privacy, passage, double cylinder, double cylinder vestibule, half cupboard and dummy.

CARBINE PE3000 SERIES KNOBSETS

The Carbine Epsom series of locksets has been praised for its versatility, reliability and ease of use since its inception into the market in the late 1990's. It is a high grade commercial knobset which has a cylindrical fixing. Distinctive by its solid round knob shaped look and large rose, they have served the commercial market place successfully for many years and have gained a reputation for being a proven performer in that time. It is both practical and functional in today's commercial market. As well as being sold in a boxed pack, they are also available in a retail display pack for those looking to display a range of commercial locksets on their shop walls.

Carbine Epsom 3000 Entrance Set

FUNCTION

• Outside function: Lockable by inner push button, key unlocks both knobs but does not retract the latch.
• Inside function: Opened by knob at all times, push button only locks outside knob.
• Fire rated for 2 hours to Tyco specifications
• Cylindrical fixing

CARBINE PS4000 SERIES KNOBSETS

The Carbine Sandown series of locksets was introduced into the market a little later than its cousin, the Carbine 3000 series. It was done so to satisfy a demand for a competitively priced tiebolt commercial lockset for those prefering the tiebolt mechanism to that of the cylindrical. It has been praised for its versatility, reliability and ease of use since its inception into the market. Distinctive by its solid round knob shaped look and large rose, they have served the commercial market place successfully for many years and have gained a reputation for being a proven performer in that time. It is both practical and functional in today's commercial market. As well as being sold in a boxed pack, they are also available in a retail display pack for those looking to display a range of commercial locksets on their shop walls.

Carbine Sandown Entrance Set

Features include:

• Outside function: opened by knob when free. Key locks or unlocks both knobs but does not retract the latch
• Inside function: opened by knob at all times, Turnsnib locks outside knob
• Fire rated for 2 hours to Tyco specifications
• Tiebolt fixing
• Supplied with 60-70mm adjustable latch in both boxed and display pack.
• 127mm backset is available if required
• Suitable for doors 35mm - 45mm in thickness
• Especially made to take restricted in line and nearly all higher security restricted cylinders
• Suits KeyLine LKW9 (Silca LW5) profile
• Cylinder is a 6 pin PD style brass cylinder
• Spare cylinder available for TES5 to suit Gainsborough keyway CLAIC-TES5
• Has a rose diameter of 75mm
• Spacing rings or plates are available for use on thinner doors
• Supplied with visible internal fixing
• Stainless steel latch bolt with a 12mm projection

CARBINE PD7000 SERIES LEVERSETS

Distinctive by its solid look and large rose, the Carbine Doncaster PD7000 series have served the commercial market place successfully for many years and have gained a reputation for being a proven performer in that time.

Carbine Doncaster Entrance Set

Features include:

• Function: Outside: opened by lever when free. Key unlocks and retracts the latch
• Inside: opened by lever at all times. Push button locks exterior lever
• Optional choice of a standard or clutching function, the clutching model features an operation where the outside handle still moves when locked, ideally to prevent lever damage from forced entry
• Fire rated for 4 hours to Tyco specifications
• Cylindrical fixing
• Suits KeyLine LKW9 (Silca LW5) profile
• Cylinder is a 6 pin PD style brass cylinder
• Spare cylinder available for TES5 to suit Gainsborough keyway CLAIC-TES5
• Supplied standard with a 70mm backset, 60mm available upon request and an extension tube to extend to 127mm is available
• Square shaped lever handles with a strong lever return spring
• 85mm wide rose with two locating fixing holes to prevent the leverset from spinning
• Suitable for doors 35mm - 50mm in thickness extension kit is provided to make it suit the 50mm
• Concealed fixing
• Stainless steel latch bolt with a 12mm projection

NOTE: There is now a knob outside, lever inside combination set that works exactly as above (PD7000KN).

CARBINE PA8000 SERIES LEVERSETS

The Carbine Ascot series of leverset is a high grade commercial leverset with a strong handle spring than at least equals and generally surpasses many other similar leversets. Similar in appearance to it's Carbine 6000 series leverset counterpart, it's primary difference is it offers concealed fixing. It also has a stronger handle spring and a slightly longer lever handle.

Carbine Ascot Entrance Set

Features include:

CARBINE DIGITAL

T he Carbine Digital Locksets are a next generation product. Heres why: Incorporating a full lever handle on the inside rather than just a small knob, it is user-friendly. It is also the first digital lockset to come with its own stainless steel fitting plate. In this way you can easily retrofit a standard lockset. The existing hole in the door will be covered without the installer having to custom-make a fitting plate. In addition, this lock is fire-rated! Carbine Digital locks have been improved on the standard market offerings and are tried and tested to offer you and edge in mechanical digital lock fitting.

MECHANICAL DIGITAL LOCK

Carbine Digital Lockset

The Carbine digital is innovative by the way that it makes improvements to a standard product. It is a robust code changeable (from the back of the digital pad) mechanical digital lock and is the most flexible digital on the market. There are many different models to choose from. There is the NK2000 which fits on to timber doors with an internal lever handle. The NK2000-2 model will fit with Lockwood 002 deadlatches and with either Legge L9MFS or Lockwood 3572 commercial mortice locks (internal furniture not included). You can also purchase a dual pad model (NK2000-KDSC) if a digital pad is required on each side of the door. Finally to showcase the lock, display stands are also available either for in shop purposes or for use on site. Features include:

• Should only be used in light to medium traffic areas. Not for use in high volume commercial areas
• It is ideal for storerooms and similar areas that don't have high volume traffic
• Comes with a 2 hour fire rating for NK2000SC model with use of a supplied latchset
• Backset is 60mm standard, 70mm and 127mm backsets available as an option
• Supplied with a reversible internal lever handle that allows fitting to left or right handed opening doors
• Easy to change user codes via removal of the back cover
• Easy grip outer knob that is larger than many other similar digital products
• Comes with a 64mm wide stainless steel backing plate that will cover up any holes or scratches from previously fitted locks
• Suits new and retrofit applications with everything provided in the package
• Includes all components and instructions for fitting and combination changing
• This lock has been cycle tested and exceeds 25,000 openings.
• Available in the finish of satin chrome
• NK2000SC suits a 45mm thick door when using trim plates, suits 50mm thick doors without use of trim plates

CARBINE HARDWARE

C arbine is the next generation in locking. Carbine is a high-end brand of locking and hardware that is chosen by locksmiths and installers. Until Carbine, developments in mechanical locking systems had been few and far between. Even when a way was found of improving a current series of locks, there was little desire on the part of the manufacturers to change what 'always has been the way'.

Carbine pushes the boundaries and looks to solve the problems that have dogged the industry for years. The Carbine Hardware range incorporates door hardware and trim plates, cabinet and furniture locking, window & patio door locks. All Carbine products feature innovative designs and modular functionality so you get a product that solves problems.

SQUARE BACK CUPBOARD LOCK

Carbine Cupboard and Drawer Locks

The Carbine Cupboard Lock is a next generation product, providing you with one lock to suit all applications for cupboard and drawer locking. The product is completely modular with changeable function (from latch to bolt and vice versa) and four possible locking directions. With this sort of versatility and a distinct price advantage over other similar products, there is little reason to use anything else. Features include:

• Heavy duty construction
• High corrosion resistance
• Easy to remove the cylinder by undoing three screws
• Will retrofit most common brands
• 30mm lock housing projection, 12mm lock case
• Uses a standard 530 cylinder
• Can be purchased in keyed to differ or keyed alike
• Supplied with a 6 pin C4 keyway, use Keyline LKW9 (Silca LW5) key and offers keying advantages re keying to other locks
• Supplied with an additional cam for keytrapped function (from Nov 2011)
• Full instructions supplied

LOCK BOLTS

Carbine Lockable Bolt

The Carbine lockable bolt has a number of uses on commercial hinged and sliding doors. Previously branded as the "Lenlok" lockable bolt, the tooling and specifications have been upgraded to meet Carbine standards. Features include:

• Streamlined 38mm height allowing numerous fitting options
• Reversible bolt
• Bolt throw 35mm
• Bolt 12mm diameter case hardened chrome plated
• Complete pack consists of lock with cylinder, flat strike, boxed strike, fixing screws, packer, template, split pin remover and multiple cams for cylinder positioning
• Locksmith kit available less cylinder, includes flat strike and fixing screws
• Standard Carbine 6 pin oval cylinder, offering compatibility with security systems
• Suits Keyline LKW9 (Silca LW5) profile
• Concealed fixing plate available

BUTT HINGE

Carbine Spring Butt Hinge

An innovative product from Carbine is the spring butt hinge. Its not a spring hinge and its not a butt hinge - its a combination of both thus leading to a product that has a wide range of usage in today's market place. The tension on the spring within the hinge can be adjusted by the use of an allen key (supplied with product) placed in the top of the hinge. Once the correct tension is achieved, it is retained by a pin. Features include:

• Ideal for internal situations where a door needs to remain closed but not secured, but does not substitute for a door closer
• Sold in sizes of 75mm and 100mm
• A sturdy hinge of 2.5mm thickness
• Weight capacity of 38kg with 2 hinges, 50kg with 3 hinges
• Satin chrome finish only

C arbine is the next generation in locking. Carbine is a high-end brand of locking and hardware that is chosen by locksmiths and installers. Until Carbine, developments in mechanical locking systems had been few and far between. Even when a way was found of improving a current series of locks, there was little desire on the part of the manufacturers to change what 'always has been the way. Carbine pushes the boundaries and looks to solve the problems that have dogged the industry for years. The Carbine Cylinders are a next generation product. Heres why: Carbine cylinders are designed and manufactured to a much higher standard than other replacement cylinders. Featuring higher quality pins and using precision factory processes to guarantee quality every time. Carbine products feature innovative designs and modular functionality so you get a product that solves problems.

PROFILE CYLINDER

Carbine Profile Double Cylinder

Since its inception in 1995, the Carbine name is synonomous with high quality and reliability throughout the security industry. Adding more variety to the range is a new selection of precision quality cylinders, suitable for commercial or residential European style mortice lock applications. Features include:

• Double cylinder style
• Body is made of brass with higher precision and wear resistance
• Twin cap design enables you to rekey one side at a time
• Barrels are easily removed with the Carbine quick release circlip
• Supplied with a fixed cam for European style mortice locks
• The cam on this cylinder rotates 360 degrees
• Supplied in 5 pin or 6 pin C4, suits Keyline LKW5 (Silca LW4) or Keyline LKW9 (Silca LW5) profile
• Available in keyed alike or keyed to differ

CARBINE UTILITY LOCKS

Carbine is the next generation in locking. Carbine is a high-end brand of locking and hardware that is chosen by locksmiths and installers. Until Carbine, developments in mechanical locking systems had been few and far between. Even when a way was found of improving a current series of locks, there was little desire on the part of the manufacturers to change what 'always has been the way'.

Carbine pushes the boundaries and looks to solve the problems that have dogged the industry for years. The Carbine Utility lock range is designed to solve diffilcult and uncommon locking situations such as trailers, outdoor gates and key storage. Carbine products feature innovative designs and modular functionality so you get a product that solves problems.

TRAILER LOCK

Trailer Lock

The Carbine Trailer Lock is a heavy grade unit that can be used on or off a trailer. Features include:

• Can be used with trailers, vans, caravans etc
• Supplied with a square bodied padlock that nestles comfortably into the recess of the unit, thus making it highly unlikely that bolt cutters and similat tools can be used against it
• Hardened horizontal locking shackle that makes it extremely difficult to cut with bolt cutters
• Made from rust-resistant, heavy gauge steel with a plated finish
• Available in two packaging forms
• With padlock in a solid display pack or
• Boxed without padlock, allowing the end user to use a padlock of their choice

DISPLAY BOARDS & MERCHANDISING

Carbine Merchandising

A range of merchandising for the Carbine range. Includes header cards, stickers and hang hooks. A counter display for the Carbine 7000 and 6000 series of leversets.

• Display is made from a MDF board
• Display unit has the capability to show two leversets
• Fixing holes and backset pre drilled.
• Backsets are drilled to 70mm as this is generally standard with most commercial leversets
• It is recommended that you pre drill the screw holes when fixing the latch to avoid the possibility of splitting the timber.

KEYLINE KEY MACHINES

K eyLine machines are manufactured in Veneto, Italy by the Bianchi 1770 Group. The Bianchi family has been involved in locksmithing, key manufacturing and key cutting machines for over 230 years. In that time Bianchi has built a formidable reputation for quality and for being at the forefront of technology. KeyLine manufactures electronic key cutting machines that are breaking new ground in the industry. These machines are so outstanding that they will change key cutting forever. KeyLine also manufacture standard, high quality, mechanical key cutting machines. These machines are durable, hard working and user-friendly. The KeyLine range of machines covers every level from basic mechanical cylinder key machines to the highest end electronic machines.

KEYLINE

The Keyline selection of key machines represent the latest in design and key cutting technology. They are manufactured in Veneto Italy by the Bianchi family 1770 Group. The family has been involved in this industry for over 230 years and has built up a richly deserved reputation for quality and a leader in the field.

Easy

Amongst their vast range of key cutting machines is the semi automatic 'Easy' model. Features include:

• Semi automatic operation that allows accuracy and speed of duplication
• Two way reversable jaws to allow gripping of Domestic or Automotive keys
• Micro switched carrage prevents accidental start up of the cutter
• Seperate powered brush allows use with no power to cutter for safety
• Plastic chip shield offers additional eye protection for safety
• Machine motor and wiring is protected by a fuse to protect against accidental over-loads
• Spare cutters and buffing brushes are available

EASY-B

Product Code	Description	Pack	Outer
EASY-B	Semi Automatic Key Duplicater	1	1
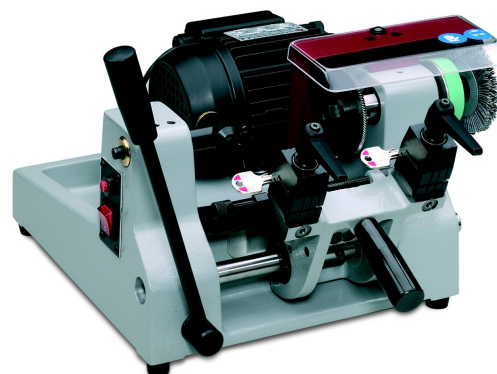

SPARE PARTS

LK Code	Product Code	Description
101234	RIC02098B	Easy HSS Milling Cutter D80x16x5 80deg
97729	RIC02654B	Tracer
99483	RIC02873B	Nylon Brush

Carat Quattro

Amongst their vast range of key cutting machines is the semi automatic 'Carat Quattro' model. Features include:

• Semi automatic operation that allows accuracy and speed of duplication
• Quiet, smooth operational machine that has no peer, a delight to use
• Four way reversible jaws to allow gripping of domestic or automotive keys
• Quick and easy rotatable jaws by a simple depress and turn procedure
• Unique scooped jaw design enables most of the key shavings to slide off into the swarf tray
• Micro switched carriage prevents accidental start up of the cutter
• Powerful neon light source directly above the cutting area for optimal visibility
• Magnifying glass for checking keys while preventing eye strain
• Micrometer adjustment of the tracer for precise accuracy on setup or correction of worn keys
• Seperate powered brush allows use with no power to cutter for safety purposes
• Plastic chip shield offers additional eye protection for safety
• Supplied with HSS cutter as standard
• Spare cutters and buffing brushes are available to suit

The QW has all the same features as Q just with 2 differences:
• Higher spec motor with 1400 rpm for better cutting speed and longer life
• Widia (Carbide) cutter supplied as standard

KEYS

K eyLine keyblanks are manufactured in Veneto, Italy by the Bianchi 1770 Group. The Bianchi family has been involved in locksmithing, key manufacturing and key cutting machines for over 230 years. In that time Bianchi has built a formidable reputation for quality and for being at the forefront of technology. KeyLine has an extensive range of keyblanks which are prevision manufactured so you get a working key every time. Using brass material with nickel plating ensures excellent cutting and durability. The KeyLine range of keys includes standard cylinder and automotive keys, aluminium KLITE coloured keys and Fancy keys. We also offer KeyLine keys coined with your company details on a range of common keyblanks.

KEY BLANK PIPE AND PIN

Lane 1000 Old Mortice Precut Keys

A series of pre cut keys from 1 - 5 to suit the Lane 1000 old 2 lever series mortice locks.

• Sold in loose format and in a minimum of 5 per key number.

MODEL DETAILS

Product Code	Description	Pack	Outer
LANE1	Lane 1000 old pre cut key # 1	10	100
LANE2	Lane 1000 old pre cut key # 2	10	100

KeyLine Fancy Key Blank

The wonderful patterns and bright colours offered with the Keyline Fancy Keys provide a new way to distinguish keys on the ring. A great range of assorted patterns are available and can be supplied with a practical display. For those seeking a display board, please enquire with your local sales office as there are attractive counter displays to suit.

All keys within the ranges can be purchased individually, however a minimum of 5 in total must be purchased to validate an order.

There are multiple ranges to choose from. The selection includes:

The Crazy Animal Family
• 6 different varieties to select from in a bright range of colours

The Horror Family
• 6 different choices to select from including vampires, Frankenstein, the mummy, grim reaper and witch characters, again in a bright range of colours

The Smiley Family
• 6 different smiley face designs in a bright range of colours

The Optikey Family
• 6 different patterned designs in a black and white finish

The Horoscope Family
• The 12 star signs portrayed in bright coloured key blanks

The Standard Family
• 13 different designs including droplets, ladybugs, florals, fish, rainbow etc

All families are well worth a look.

KEYLIGHTS

T he keylight is a simple idea, a light source buried into the body of a key blank. This product has a limitless amount of uses, it can be used for what it is intended to and that is to make it easier to find the keyhole in darker spots or at night. It can also be used as a minor light source in poorly lit areas or even as a mini torch if searching for something, the ideas are up to you!

KEYLIGHTS

KeyLights to Suit Lockwood C4 Broach

Features include:

• Offers a light source when trying to use a key in the dark
• Has a good bright light
• Comes in a KW1 (C4, Keyline LKW5 or Silca LW4) broach so perfect for the Australian market
• Key blank is made of brass and is nickel plated
• Comes in head colours of black, dark blue, green, purple and red
• Made in the USA
• Has a replaceable battery if desired but even if the battery dies, you can still use it as a working key
• Battery life of five years to US standards. This will vary on the amount of use of the battery in the key.
• Can be purchased on a display stand of just KW1's, can be purchased on a mixed stand with other broaches or individually if preferred

Lenlok — Creating Superior Locks Since 1946

LENLOK LOCKING PRODUCTS

Lenlok (formerly Lenlok Hales) was founded by Alfred Roy Hales, patriarch of the Hales family, in 1946. Alfred was a talented toolmaker who saw the opportunity to create quality locks for the Australian market. His first lock was a simple pull handle. Since then the range has grown to include: Pull handles T-handles Roller door locks Flush handles Cam locks Hinges Lenlok has undergone a revolutionary change in recent years as we are in the process of updating all our product designs and incorporating new patented improvements including the Carbine CBS C4 barrel system. Great new product ranges include the CBS Roller door lock range and new T and L handles range now available.

T HANDLE

Lenlok Plastic T Handle

The Lenlok plastic T handle. Features include:

• Heavy duty black plastic construction that handles extremes of weather and usage
• 90 degree right-hand turn operation
• Standard 75mm spindle supplied, 100mm model also available if needed
• Front fixing only
• Display pack version is available, bolts are supplied with this model only
• Bolts not supplied in bulk format, order 3495 if bolts are needed
• Keyblanks available use Keyline LKW2 (Silca LW3)

Lenlok CBS T Handle

For decades, Lenlok have been the favourite T handle in the market. Their series of T handles for garage doors and other applications have been successfully used by both the trade and the home handyman for many years, offering both a functional and easy to use product. Now with the flexibility of the Carbine Barrel System. Lenlok CBS T and L Handle range offers high security through the use of a clutching system and handle snap off feature that protects the integrity of the lock when undue force is applied. Features include:

-Available in 3 wafer barrel series, C4, LF6R and LW3 keyways
-C4 keyway available in 5 pin only and are supplied fully assembled
-The C4 wafer barrel is available in KA1 to KA10 and KD key codes
-LW3 keyway barrel matches in with old series Lenlok T handles
-Mastered wafers are available for the LF6R wafer barrel
-Clutching handle to prevent lock damage when undue force applied
-Interchangeable spindle lengths 75mm, 100mm and 150mm lengths
-Handing can be easily changed from 90 degrees clockwise and anticlockwise, and 180 degrees clockwise and anticlockwise
-If undue force is applied to the handle whilst the lock is in the locked position, the handle 'snaps off' that leaves the lock in a state where it can no longer be attack.
-Optional key retained feature (Roll pins to convert are included - Dec2013)
-Flexibility of front fix and rear fixing options (all components supplied).
-Personalised customer logos(minimum order quantities apply)
-All barrels are supplied with 2 keys

Lenlok CBS L Handle

For decades, Lenlok have been the favourite L handle in the market. Their series of L handles for garage doors and other applications have been successfully used by both the trade and the home handyman for many years, offering both a functional and easy to use product. Now with the flexibility of the Carbine Barrel System. Lenlok CBS T and L Handle range offers high security through the use of a clutching system and handle snap off feature that protects the integrity of the lock when undue force is applied. Features include:

-Available in 3 wafer barrel series, C4, LF6R and LW3 keyways
-C4 keyway available in 5 pin only and are supplied fully assembled
-The C4 wafer barrel is available in KA1 to KA10 and KD key codes
-LW3 keyway barrel matches in with old series Lenlok T handles
-Mastered wafers are available for the LF6R wafer barrel
-Clutching handle to prevent lock damage when undue force applied
-Interchangeable spindle lengths 75mm, 100mm and 150mm lengths
-Handing can be easily changed from 90 degrees clockwise and anticlockwise, and 180 degrees clockwise and anticlockwise
-If undue force is applied to the handle whilst the lock is in the locked position, the handle 'snaps off' that leaves the lock in a state where it can no longer be attack.
-Optional key retained feature (Roll pins to convert are included - Dec2013)
-Flexibility of front fix and rear fixing options (all components supplied).
-Personalised customer logos(minimum order quantities apply)
-All barrels are supplied with 2 keys

ROLLER DOOR LOCKS

Lenlok CBS Roller Door Lock Dual Grip

The design team at Lenlok have recently undertaken a major upgrade of all models. The All New Lenlok range of roller door locks is an advancement on the tired range of like products that have been on the market for many years now. With a far more modern design, retrofit features and keying options, this range is a must for the retailer, tradesman or manufacturer. This model is a narrow style version and has a rectangular fascia with dual finger grips. Features include:

• Retrofits to existing market standards e.g Lenlok 3321
• Uses 2 different barrel systems, C4 4 pin cylinder tumbler for one series, CBS wafer barrel LF36 (LF27) for other series
• C4 4 pin cylinder is LKW5 (LW4) keyway. CBS wafer barrel is LF36 (Silca LF27) keyway
• Can be supplied with or without barrel / cylinder
• Can be re-keyed without the removal of the main mechanism from the door
• Patented Cam Mechanism Design allows the lock to be changed from a freelatching mode into a deadlocking mode and vice versa
• Cam cannot be removed in the locked position
• Tamper proof screws supplied to enhance security in deadlocking mode
• The key is supplied with a cut code that can be used both from the front and back allowing locking and unlocking from inside when in deadlocking mode
• Ergonomically designed internal operating knob offers a more positive grip
• Locking arms have a 19mm throw
• High quality bright chrome finish zinc alloy metal fascia
• High quality full metal locking mechanism
• Lock body designed for minimum protrusion (smaller than existing Lenlok models)
• Supplied with tape to hold face plate on for easy installation
• Slide arms are constructed from galvanised steel for increased strength and have threaded holes for the screws making installation easier
• Adhesive logo which can be replaced with personalised customer logo on request. It can also be flipped 180 degrees for handing of the lock
• Lock body has patented integrated mechanism protectors. These keep the door from applying pressure to the mechanism
• Can be purchased in a display pack for retail purposes
• 4321NB (wafer model, no barrel) accepts LF27WB barrels. The lock includes all parts except barrel, keys, cam & cam / cylinder screws
• Barrel & keys supplied along with cams, cams screws, cylinder screws
• 4321-C4-NC (pin tumbler model, no cylinder) accepts C4-4PIN cylinders. The lock includes all parts except cylinder, keys & cam screws
• C4-4PIN cylinders do not include all other cams & screws , except cam screws

Tilt A Door Access Handles

These handles are designed to use with L handles on colorbond gates or with T handles on tilt a doors. Features include:

• Models 1591 and 1593 are designed as an internal handle on gates
• Two sizes to choose from - 76mm and 102mm
• Measured from the centre of the spindle hole to the end of the flat tongue
• Engage the spindle of the handle and tighten with the collar screw supplied
• Made of zinc plated steel

• The garage access handle model TDLH1 is made to work on the inside of tilt a doors
• Holes in the handle are for the tee handle spindle and the two smaller holes to fix the tilt a door cable
• Operation of the inside handle retracts the spring side latches and enables the door to be lifted up
• Handle made of zinc plated steel

• The non locking internal lever handles (1582 and 1584) are used ideally for personal access doors inside a garage or shed
• Cut the spindle to the correct length and tighten grub screw to complete
• Made of diecast zinc

• Latch tongues 1586 and 1587 are used on personal access doors
• Have adjustment feature that allows the spindle to remain intact and no need to cut to the desired length

CAM LOCK 5 DISC

Lenlok Cam Lock Round Face

The Lenlok series of cam locks is used for letterboxes, cabinets and various other applications. Features include:

• Body lengths of 16mm and 30mm
• Comes standard with a round face
• 16mm cam locks are commonly used in acrylic display units, letterboxes and general sheetmetal manufacture. These cam locks can also be used as hinged glass door locks by using rubber washers to protect the glass. Fixed by a hexagon nut.
• 30mm cam locks are used mainly on timber cupboard doors or drawer fronts and in general cabinet manufacture. These locks are supplied with a pronged washer to be fixed on the inside to prevent the lock from spinning in the hole and are fastened by a hexagon nut.
• Available in keyed to differ and various keyed alike groups
• Supplied with zinc plated nut as standard
• Keyblanks available, use Keyline LKW2 (Silca LW3)
• The FL range of spare cams do not fit these locks

Lencare Home Modification Hand Showers

The Lencare hand shower for the home modification and health care industry is widely accepted as being if not the best, then near to the best on the market.
With the changes made back in 2011 to address the problems that had plagued industry hand showers, Lencare listened to the advice of industry participants and made the necessary changes. Those changes were to supply a sturdy and reliable swivel assembly, stop the leaking issues, get the no drill and wall brackets to fit better on the swivel assemblies, include a non return valve into the no drill bracket and provide a decent & good looking hand held water piece. We are happy to report that all those issues have been attended to without any hiccups for many years now, thus leaving this hand shower model as arguably the best in the business. Features include:

• 2 metre flexible hose as standard. The hose is a copy double wound German hose design with a conical hose end, surpasses regulatory tests and is super reliable. Resists internal cracking, fatigue and failure.
• A 1.5 metre hose model is available if preferred
• Supplied with as ultra reliable and sturdy swivel assembly unit
• Tapered no drill & wall brackets allow the swivel unit to slip on easily and locate half way down the pin, preventing water pressure from dislodging the unit off the related pin
• The shower has a non return or backflow valve built in to the no drill bracket making it compliant with industry regulations in different States
• Comes with a straight hand showering piece that suits all users
• Exposed rubber nipples on the shower head can be massaged to remove any calcium build up over time
• Supplied with 4 x 2mm rubber washers and 2 x 4mm rubber washers to satisfy any need when installing
• Distributes a medium water pattern spray that is neither too narrow or too wide
• WELS & Watermark approved
• Display packaged and bar coded for retail purposes if required

RYOBI®

Who is Ryobi:

Ryobi is a world leading brand in door closers. From the home to the office, Ryobi offer door closers and other architectural hardware that support a comfortable lifestyle and emphasize safety.

Why Choose Ryobi:	Product Categories:	Target Market:
The Ryobi brand of door closers utilise sophisticated casting and machining technologies to create new frontiers in beauty and functionality. The Ryobi door closers offer exceptional durability yet continue to please the eye.	Door Closers	This range is suited to Hardware Stores and the Builders Market.

RYOBI

The Ryobi range of door closers are top quality high performance products. The quality and leading edge technology comes from being the worlds largest and most advanced die casting manufacturer Ryobi started producing surface mounted door closers in 1963, since then Ryobi has developed the production technology and quality that is recocnized by architects, installers and home owners, as second to none! Ryobi products have a massive edge over their competition in their strength and reliablity, and are known as the longest lasting closers in the marketplace. The Ryobi door closer range is divided into consumer door closers and industrial door closers, to fit everything from basic screen doors to the heaviest grade industrial doors.

RYOBI DOOR CLOSERS

Ryobi Doorman Series Door Closer

The Ryobi doorman range of door closers are designed for residential usage and have been popular with hardware stores for many years. In March 2004, model numbers were changed and the additional colour of white was added to each of the ranges. There are still three models to choose from :

• The old style 102A series which is used on solid core entry doors and has a built in automatic hold open feature. This model series is now known as the HDC12SA series.
• The old style 101P series which is used on internal doors e.g toilet, bathroom, bedroom. These are non hold open models. This model series is now known as the HDC11P series.
• The old style S101P series which is used on security screen doors and has a built in automatic hold open feature. This model series is now known as the HDC11SP series
• When using the parallel arm model the door weight capacity is reduced by 20% compared to the standard arm application
• All models have adjustable closing speed

KEYBOXES

UTC Key Safe

This is a box that is accessed by using a changeable 4 digit code. Once the code is entered, the cover is then removed exposing a space where a key or any other product can be hidden from general view. Its ideal for access to houses, offices and holiday dwellings. It is an ideal product for carers of elderly or disabled people, for use in retirement villages and aged care facilities. The usage is only limited by your imagination. Features include:

• Two models to choose from:
• Screw fix model via 4 pre drilled holes in the back of the unit (S6)
• The other is a portable model (C3) which offers no screw fixing but instead a shackle that can be fixed to any permanent fixings around the dwelling. It can fit over a rail, the throat of a round lockset or in some cases around a pipe outlet near a garden tap
• The portable model has an extended shackle and once code access has been obtained, a key inside the unit is used to operate and release the shackle
• Comes with a standard code four digit concealed inside the package that can be changed quickly and easily by the intended user, full instructions are supplied
• Has easy to operate buttons
• Has a clear button if the wrong code is entered in
• Ideal for carers who need to gain access to the homes of the elderly or sick
